Key Features

- Electronic Case Report Form (eCRF)
- Electronic Patient-Reported Outcomes (ePRO)
- Electronic Clinical Outcome Assessments (eCOA)
- Surveys
- Efficient Form Design and Data Organization
- Modules Creation and Parameters Management
- Data Collection and Management
- Real-Time Data Validation and Monitoring
  - Role-Based Access Control
  - Audit Trails and Compliance
  - Multilingual Support
  - Integration and Interoperability
  - Advanced Reporting and Analytics
  - Signature of Patient's form by Researcher
  - Customer Support and Training

aChiral CAPTURE

A Comprehensive Electronic Data Capture (EDC) Solution

aChiral Capture is a highly flexible and adaptable Electronic Data Capture (EDC) platform designed to meet the diverse needs of clinical research professionals. This all-inclusive solution encompasses a wide range of data collection and management tools, streamlining the research process and significantly enhancing the overall quality and speed of clinical studies.

Maximize user experience, streamline operations, and ensure data integrity.

aChiral Capture is a state-of-the-art EDC platform that combines essential data collection and management features with advanced functionalities to deliver a powerful, user-friendly solution for clinical research professionals.

By streamlining operations, ensuring data integrity, and offering unparalleled flexibility, achiral Capture empowers researchers to conduct high-quality, efficient clinical studies that drive medical advancements and improve patient outcomes.

Designed for clinical research

Administer customized forms to suit the specific requirements of each study, promoting seamless collaboration among research teams.

Collect standardized, high-quality data on clinical outcomes. Minimize errors and discrepancies and improve the reliability of search results.
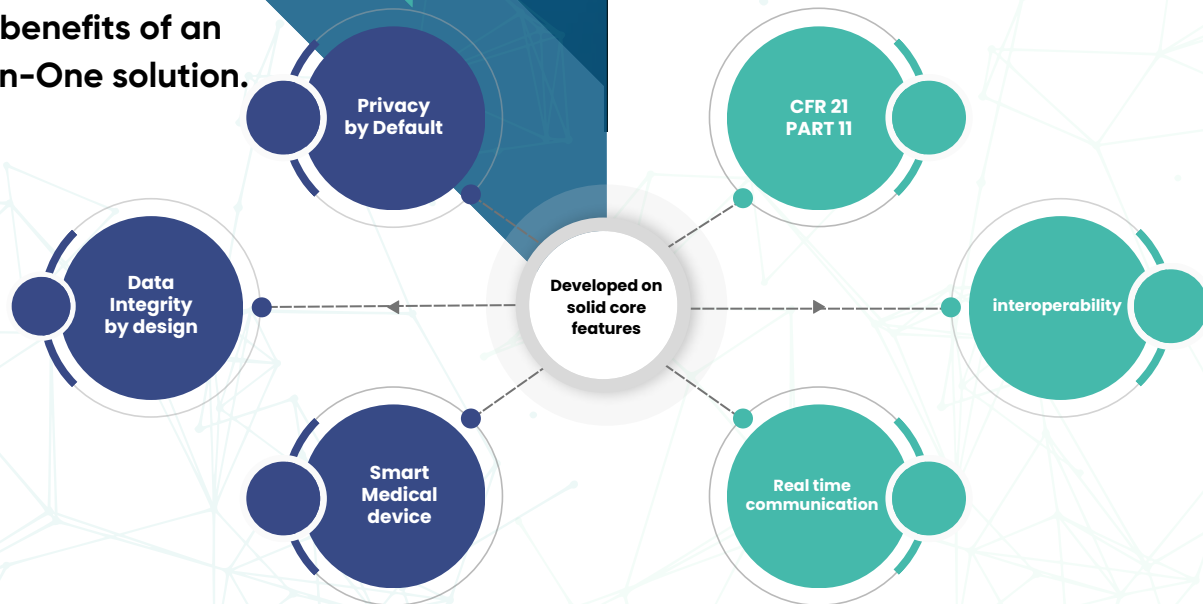

Collaborate with other structures by securely sharing projects, forms and results.

Ensure the validity and integrity of electronic signatures for your patient data.

The benefits of an All-in-One solution.

CAPTURE

Key Features

- Hospital and Clinic Management System
- Department Management
- HR Management
- Doctor Management
- Patient Access and Management
- Patient History
- Payment Management
- Booking Visit System
- Custom Consent Form Builder
- eConsent
  - Audit Trail
  - Document Management and Request
  - Visits, Cases, and Appointments Management
  - Donor List Management
  - Laboratory Results Management
  - Prescription Notes and Posology
  - Smart Devices Data Sharing
  - Integration with aChiral Capture
  - Role-Based Access Control

aChiral®
CONNECT

An Integrated Clinical Management and Telehealth Platform

aChiral Connect is a comprehensive clinical management system designed to streamline telehealth and electronic visit management processes, enhancing the overall patient experience and optimizing healthcare delivery. This all-in-one platform offers a wide range of features that facilitate seamless integration and coordination between healthcare providers, patients, and clinical research activities.

All the tools and information you need in one platform

aChiral Connect is a powerful, user-friendly platform that unifies healthcare providers, patients, and clinical research activities, enabling remote care, informed consent, and seamless coordination for clinical visits and consultations.

It strengthens the synergy between patients, doctors and researchers.

Communicate with colleagues and patients in real time.

Appointment management with a dedicated calendar. Add, edit or cancel an appointment keeping the patient informed.
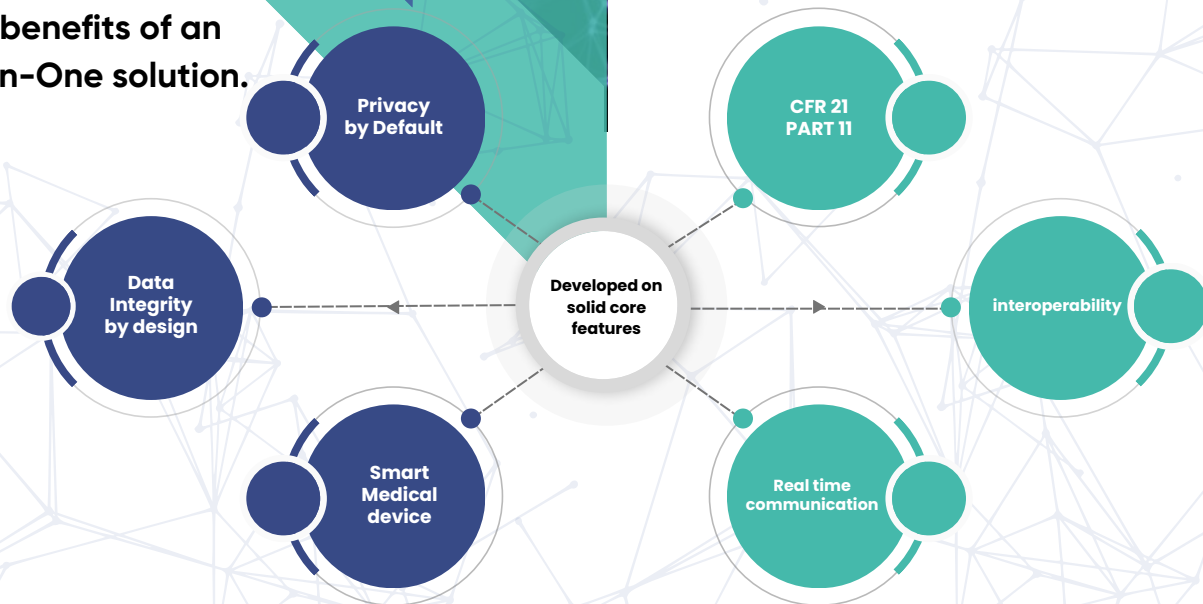

Management and control of medical records and patient history.

Teleconsultation and follow-up. Use your smartphone to access remote visits with ease and security.

The benefits of an All-in-One solution.
